

## UK NEQAS BC is proud to announce the following speakers and topics confirmed for Clinical and Laboratory Haemostasis 2020

**Date:**

**3rd & 4th June 2020**

**Venue:**

**STEM Conference Centre, Sheffield Hallam University, UK**

### **3rd June 2020**

Transforming lives: Novel therapies for haemophilia;  
Dan Hart, UK

Measuring extended half-life clotting factors;  
Elaine Gray, UK

Choosing outcome for assessing non-replacement therapies for haemophilia;  
Johannes Oldenburg, Germany

Clinical and laboratory diagnosis of TTP: An integrated approach;  
Adam Cuker, USA

Managing TTP;  
Marie Scully, UK

Is DNA sufficient for diagnosis of inherited platelet disorders;  
Andrew Mumford, UK

Diagnosis of inherited platelet disorders, the revival of the blood smear and ethical considerations;

Andreas Greinacher, Germany

## 4th June 2020

Personalising DOAC therapy: the role of the laboratory;  
Lorenzo Alberio, Switzerland

Resolving DOAC interference on coagulation testing;  
Sean Platton, UK

Extended thromboprophylaxis: is it justifiable?  
Will Lester, UK

Safe anticoagulants: Targeting the contact pathway;  
Thomas Renné, Germany

Venous thromboembolism and anticoagulant therapy in athletes;  
Stephan Moll, USA

Heparin induced thrombocytopenia testing;  
Moniek de Maat, The Netherlands

Point of care monitoring of haemostasis during postpartum haemorrhage;  
Peter Collins, UK

Plus presentations of the latest data from the UK NEQAS BC team, a full exhibition from relevant companies, a lively debate to close day 1, followed by canapés and drinks, which provides a great networking opportunity.
